

# Instagram Testing (web version)

MODULE: Login, Profile Management, Content Creation and Sharing, User Search

Defect ID	Module	Test Case ID	Defect Description	Severity	Status	Remarks
DEF001	Valid Log In	TC_Login_01	There is no limited time session. User is kept logged in for several days unless logged out manually	High	Open	Security Concerns. Should have login session timeout without hampering the core functionality and features.
DEF002	Verify user can share note	TC_Content_05	User is not able to share a note if a note is already present in the system.🔗	High	Open	Investigate sharing logic for notes. Ensure that existing notes do not block new share and Automate to delete the existing note to share new ones.
DEF003	Content Creation and Sharing	TC_Content_06	<b>Note Length Limit Enforcement:</b> The application prevents sharing of notes longer than 60 characters without clear messaging to the user.	Medium	Open	Clarify the product requirements regarding note length. If longer notes are allowed, update the validation logic; if not, provide a user-friendly error message.
